Feedback that Moves Learning Forward

Feedback plays a central role in securing pupils' learning, supporting them to know how to deepen their knowledge and understanding or improve their performance. At The Shade Primary School, we recognise that, in order for feedback to be effective, it needs to be understood and accepted and to be actionable so that pupils can use it to secure improvements in their knowledge and performance at a later time. Part of this relies on feedback providing motivation to apply effort alongside the specifics of the strategies children need to employ. All feedback and marking should have a clear purpose for both the child and the teacher. Marking and feedback should be meaningful, manageable and motivating.

The feedback process should enable children to become reflective learners and help them to achieve their full potential. A classroom culture of *growth mindset* - where mistakes are used as learning tools - is a vital part of the assessment cycle.

At The Shade Primary School, high quality marking and feedback is informed by the following principles:

- **Focus Forward:** Formal and informal assessments are used to identify areas for improvement in pupils' performance or gaps in their understanding. Next steps will focus on the actions that may be taken to improve future performance. It is crucial that there is opportunity to make improvements. To maximise the impact of feedback it should be given part-way through a learning cycle, not solely at the end.
- **Keep it Positive and be Specific:** In order to be motivating and actionable, feedback should largely be framed in language that is positive and encouraging. Marking will highlight the things that pupils are succeeding at that they should continue to reinforce alongside the things they can do differently to make further progress. It is crucial that feedback is as specific as possible so that pupils receiving the feedback know what to do in response e.g. Rather than suggesting that a pupil should 'write a better conclusion', specify how the conclusion could be improved.
- **Match the Message to the Pupil:** Feedback only succeeds if the pupils trust it and use it to increase their effort or raise their aspirations and, as a result, improve their performance. Children respond to feedback in complex ways. Some need careful nurturing and respond badly to perceived criticism. Others need a strong push to lead them to increase their effort because soft feedback makes them complacent. At The Shade, we recognise the value of knowing our pupils so that the impact of feedback is maximised.
- **Reduce Feedback Over Time:** As pupils engage in independent practice and gain confidence, the detail provided within feedback is reduced and more *thinking time* is given before feedback is offered. At The Shade, we aim to foster resilience and a commitment to learning by coaching pupils to generate as much self-assessed feedback as possible referencing success criteria, models, working walls and prior examples as needed.

Feedback as Actions

If feedback is to move pupils forward in their learning, it can be helpful to frame it as an instruction to do something. Pupils respond to the marking and feedback that addresses their learning needs. At The Shade Primary School, feedback centres upon: *intervention to support*, *intervention to consolidate* and *intervention to challenge*. Feedback will typically fall under one of the four categories that follow:

- **Redraft or Re-Do:** Giving opportunities to improve a learning outcome - or an aspect of an outcome - by repeating it one or more times, taking on board ideas about how the work may be completed to a higher standard.
- **Rehearse or Repeat:** Ask pupils to focus on a certain aspect of learning that they have already encountered with a view to improve their confidence and fluency. This could – for example – include repeating a set of mathematical problems or rehearsing explanations across the wider curriculum. Improvement through repetition and rehearsal can be secured in a range of subject contexts.
- **Revisit and Respond to More Questions:** Instead of going back to make corrections on a complex array of previous questions, it can be more productive and efficient to re-teach some key elements where common errors were occurring and then set a fresh set of questions for pupils to respond to.
- **Research and Record:** Where pupils' learning outcomes would be improved by referring to a wider range of ideas, texts, case studies, examples or containing more details, the feedback may centre upon the completion of focused research – online or from specific books – before recording their findings. They should then reference these new ideas in an improved version of the task.

Appendix One: The Shade Primary School

At The Shade Primary School, we ensure that marking and feedback contributes to visible signs of improvement

- Involve all adults working with children in the classroom
- Inform future planning and individual target setting
- Be done promptly and within the lesson where possible
- Be used consistently throughout school

Marking Expectations

All lessons must have a clear learning objective or knowledge note question that is shared with the children, to aide marking, all written tasks will begin with either:

- *We are learning to...*
- *We are getting better at...*
- *A title with a clear purpose in years 4, 5 and 6*
- *Or a Knowledge strip identifying key learning.*

Verbal Feedback

Progress checks take place throughout lessons by all adults in the classroom. Staff will constantly be giving live feedback to the children.

Verbal feedback is the most effective form of feedback. Verbal feedback must be identified using the code 'VF' in green or a 'VF' stamp. Progress is likely to be seen in the child's work through purple polishing corrections.

Written feedback

Written feedback should be succinct, follow the school's handwriting policy and use child-friendly language. Where relevant, it should refer to marking ladders so that children know how they did meet their learning objective.

We use '**tickled pink**' and '**green for growth**' to ensure that children understand their feedback.

Pink pens

- Show what staff liked about their work
- Two ticks indicate exemplary words, sentences or phrases
- Calculations/problem-solving set out correctly

Green pens

- Move learning forward by identifying areas for improvement
- Underlining a word or phoneme to indicate a spelling error.
- Worked examples, modelling, questions or next steps (including further challenge)

Children's response to marking

Children are expected to respond to the marking and feedback using their **purple polishing** pen when receiving live feedback in all lessons, in addition teachers should plan opportunities for at least 2-3 purple polishing sessions per week in each core subject.

Any amendments or improvements to their work, following the feedback, need to be done in purple so that staff can see that the child has responded to the feedback given and the impact it has had.

Marking Codes

All teachers will share the marking codes with their class and age-related non-negotiables at the start of the academic year.

| | |
|---|---|
| SP | Spelling error |
| P | Punctuation error |
| C | Capital letters |
| // | New paragraph |
| *-----* | Checking for grammatical sense |
| ^ | Missing word or punctuation |
| T | Verb tenses |
| VF | Verbal feedback |
|  | Next step |
|  | Exemplary words, sentences or phrases |
| Green dot or green underlines | Incorrect answer or an error, something to check. |

Talk 4 Writing

- Cold writes must be marked against age related non-negotiables using blue marking ladders. (Spelling, handwriting, presentation, grammar, punctuation)
- Teachers must identify key focus areas from marking to address in the following unit of teaching.
- During the Innovation stage; writing must be marked daily against toolkit and non-negotiables.
- Hot tasks must be marked against age related writing toolkits and non-negotiables.
- Next steps must be identified in cold and hot writes using the age related non-negotiables.

Maths

- Maths is live marked daily following the marking codes.
- All staff promote Maths Mastery approach encouraging deeper thinking through marking.
- Maths is live marked daily following the marking codes.
- All staff promote Maths Mastery approach encouraging deeper thinking through marking.

Foundation Subjects

- Staff will 'live mark' in foundation subjects with either verbal or written feedback, using the agreed marking codes. Staff will focus their feedback on:
- Whether the child has met the learning objective using a 'target met' stamp
- Non-negotiables linked to age related expectations
- SPAG for age related expectations, CSP targets or vital vocabulary for the lesson
